DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04 January 2008 has been entered.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conte (US 6,658,726) in view of Long (US 5,740,608).

Conte discloses in Fig. 1 8-11 and 22 of different cable-end processing stations and 22 being a double crimping unit; 5-6 provide cables and belt drives; 7 is the swiveling arm and gripper; Fig. 8 shows a turntable with a belt drive below 46 and 47; 14 is a cable transportation belt, except for Conte's 7 being a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length.

Fig. 8

3/7/07, EAST Version: 2.0.3.0

Long discloses in Figs. 9-11 a conveyor belt 88 being a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Conte by providing a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length, as taught by Long, for the purpose of making and stacking electrical leads.

Response to Arguments

3. Applicant's arguments with respect to claims 17-32 have been considered but are moot in view of the new ground(s) of rejection.

4. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional).

Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
